

## Attributions

The BUCT-China 2014 consists of a group of undergraduates and one advisor. On this page ,you can find out about everyone who has contributed to the project. We would like to thank all the assistance, and without which the project would not have been possible. We would also like to thank our advisor who generously offered lab resources for us to do the experiments. We would like to thank mostly is our college of life science and technology, for all of the financial support. These contributions have helped us enormously. All work on this wiki was carried out by all ourselves absolutely unless stated otherwise. For a full list of acknowledgements, please see the following page:

### Students:

With the help of School of Life Science and Technology, we establish a team called BUCT-China. This is the first year to participate in iGEM, we are so excited to be in such a amazing life science journey. Although there are many troubles and we don't have enough experience, all the teammates try our utmost to achieve the goal.

### Zhang Zhao

Zhang zhao is a senior, she is major in biotechnology. She is the core member of our experiment part and the project designer. Zhang zhao is an absolutely necessary member in our team because of her knowledgeable diligent, and responsibility.

### Wei wei

Wei wei, a senior, the leader of our team, is in charge of team routines, such as, holding a meeting, arranging activity and keeping team collaborating efficiently. He is responsible for the design of detection device and microfluidic chip.

### Cao Shengwang

He is a senior major in bioengineering. He is a reliable person with rich experience of molecular biology experiment. In our team, he designs our part and does some experiment. We learn a lot from him.

### Duan Hongwei

Duan Hongwei is a junior major in chemistry engineering, he is the only one not from College of Life Science and Technology. He has a great sense of humor that always makes his friends happy. He is responsible for part of experiment.

### Liu Dongdong

Liu Dongdong is a junior and major in bioengineering. He is interested in doing research and wants to explore his options in it. In our team, he does much experiment work, also, collating of data.

Pan Siri

He is a senior and he is major in bioengineering. He is really skilled in English, so he translates the paper for us. Pan Siri has the courage to take responsibility, he is a great teammate.

Mi Hao

Mi Hao is major in bioengineering. He is a creative guy and brings us a lot of joy. Also, he put forward good ideas for both our experiment and Human Practice. It's quite interesting to work with him

Wang Yannan

Wang Yannan is a junior major in pharmaceutical engineering. He has great ability of organizing and planning, most of our activities are planned by him.

He Jie

He Jie is a junior majoring in bioengineering, lively, sanguine and warm-hearted are by words of him. He does some supportive work; also, he is responsible for part of the experiment.

Zhu Shengwei

Zhu Shengwei has a clam personality. He does many paperwork and experiment. He is the indispensable one in Team BUCT-China.

Gao Juanhong, junior, is in charge of the design of our wiki, poster and team uniform. During her spare time, she enjoys reading, designing and learning new things. In addition, she does some of experiment.

Zhao Tian

Zhao Tian is a junior and she is major in bioengineering. She wanted to try anything new. That was why she joined the iGEM team to explore synthetic biology. She is good at English, and she is responsible for acquisition of information, reading paper and Summary data.

Xu Ruobing

Xu Ruobing, a junior, She joined iGEM because she wanted to learn more about synthetic biology. She be skilled in communication. In our team, she do the job of paper reading.

Instructor:

Providing laboratory resources and ideal assistance.

College of Life Science and Technology:  
Fully financial support
